Case Study

IOT

Smart Warehouse Automation: **LazadaExpress**

Overview

LazadaExpress is an Ecommerce Giant in South East Asia part of AliBaba Group

Requirements

Client required to build a smart Solution to integrate with their Sortation systems and provide live feed about the status of each package. This includes integration with PLCs

.

Solution

EvvoIOT's Solution for this includes multiple systems and interfaces

- Integration with PLCs to ensure data integration is done.

- Get Live Feed Data from Sortation system and to ensure the data flows to Lazada Internal System.

- Integration was focussed to ensure Auto Inbound & Outbound are performed without any human intervention.

Technologies Used

- Database: **MS SQL**

- Application Development: **Dotnet Core**

- Frontend: **Angular 8**
