

# Case Study

## IOT

**Real Values: E-Valuation: OrangeTee**

### Overview

Orange Tee is one of the largest Real Estate Agencies in Singapore.

### Requirements

Orange Tee required to build a custom solution to address the manual process done by Valuation Team. The complete valuation process had to be converted into automated system.

## Solution

EvvoIOT provided a complete automation of the Valuation process. The solution has helped the client to switch from manual process to automation.

## Key Achievements

- Automation of the operational process reduced overhead cost and optimisation of team's productivity too
- Automation of more than 80 Business Reports, made the task easier for the team and organisation to organisation large dataset and find relevant data in a glimpse
- Storage of data on **Blockchain** enabled for **transparency, reconciliation & data validation.**

## Technologies Used

- Database: **MySQL**
- Application Development: **Php**
- Frontend: **AngularJS**
- Backend: **Solidity Blockchain**
