Case Study

IT Solutioning

Website Development & Property Management Portal

Overview

Henry Butcher Malaysia is a one-stop solution for all property related needs with an extensive network of 25 offices throughout Malaysia

Requirements

Client needed a Property Management Portal Solution to manage all their properties on turn key using a Facility Management System & also a complete revamp of their holding company website

Solution

EvvoMobility's Solution included the below for the customer.

- Revamp the entire FrontEnd corporate website using a Content management system so that it is easy for clients to keep enhancing the data on their own with the unique logins provided.

- Worked thoroughly on the requirements of the Property management portal & provided a MVP system for client to test trail & run across few of their managed properties in Malaysia.

Technologies Used

- Database: **MySQL**

- Application Framework: **Drupal FrameWork**

- Technology Stack: **PHP**

- Frontend Apps: **Bootstrap & HTML 5**
